

Carroll County can be used to demonstrate the use of the Geospatial application. Carroll County is sparsely populated as indicated by the population density information. Based on the 2014 Medical Licensure data, there are no primary care physicians who list primary practice sites within the county. However, upon closer examination, citizens within a 25-mile radius from the center of Carroll County have the potential of choosing among 38 identified physicians. More specificity to those 38 physicians can also be identified if desired.
